

DBIQ as administrator of the CROCI Suite of indices (as identified below) herein gives notice of a consultation on a change for the Applicable Percentage used to calculate the Reinvested Expected Dividend. At present, in relation to a Share, a fixed percentage weight is applied to Cash Dividends as an approximation for the average withholding tax faced by a portfolio investor. The proposed change would be in relation to a Share, the hypothetical rate at which the relevant Jurisdiction taxes (or imposes a withholding tax upon) Cash Dividends paid by corporations incorporated in such Jurisdiction as determined by the Index Administrator by reference to established industry sources, and as published on the Index Administrator's Website.

For more information on this change or to provide feedback contact index.data@db.com. The consultation period will end on 20th March 2018.
